Summary

Cybersecurity-focused Computer Science student with hands-on experience in penetration testing, vulnerability assessment, and offensive security research. Proven ability to design and ship secure systems end-to-end, from an IEEE-style ML research paper to red-team automation and OWASP-compliant web applications. Top 6% globally ranked on TryHackMe with consistent, demonstrated practice.

Education

Ghulam Ishaq Khan Institute (GIKI) 2023 – Present
B.S. Computer Science | Relevant: Network Security, OS, Data Structures, Algorithms, AI
– Abdalian Higher Secondary School, Pakistan — 89% (2021–2023) Pakistan

Experience

NEXUS – Cybersecurity Society, GIK Institute 2024 – Present
President (May 2026 – Present); previously Head, Cybersecurity Division (2024 – Apr 2026) Pakistan
– Spearheaded cybersecurity workshops and CTF competitions, growing active membership by 30%+, and now establishing industry speaker sessions and hands-on lab programs for 100+ members as President.
– Designed and delivered hands-on offensive security labs covering web exploitation, network scanning, and CTF methodologies.
CyberSecurity Malaysia Jun 2024 – Jul 2024
Ethical Hacking Intern (Remote) Malaysia
– Conducted vulnerability assessments on web applications using Burp Suite, Nmap, and OWASP ZAP.
– Produced structured pentest reports detailing CVEs, risk ratings, and remediation recommendations, applying OWASP Top 10 methodology across multiple assessment targets.

Projects & Research

IPDR-Cloud – ML Proactive Disaster Recovery (Research Paper) [github] [Python, DQN, PyTorch] Jan – Apr 2026
– Co-authored IEEE-style paper; DQN agent trained on Google Cluster Trace 2019 achieves 96.5% SLA compliance and cuts mean RPO to 0.5 min with zero SLA breaches.
KAPAv1.0 – Autonomous AI Attacker Simulator [github] [Python, ML, Scapy] Oct – Dec 2025
– Built an autonomous AI agent for authorized red-team simulation modeling recon→exploit→persist chains, cutting red-team effort by ~60%.
Zero Trust Digital Twin [github] [Cisco Packet Tracer] Jan – Apr 2026
– Designed a Cisco enterprise network digital twin implementing micro-segmentation and least-privilege access controls.
SOC Log Analyzer [github] [Python, Scikit-learn] Jan – Apr 2026
– Built an isolation-forest ML pipeline for real-time log anomaly detection.
MedSentinel – IoT Rural Clinic Monitor [ESP32, Python, ML] Oct – Dec 2025
– Built ESP32 + sensor fusion system to detect Ghost Clinics; achieved 86% accuracy and 95.8% uptime, validated by 8/10 NGO stakeholders.
Web Vulnerability Scanner [github] [Python, BeautifulSoup] Oct – Dec 2024
– Built an automated scanner detecting OWASP Top 10 vulnerabilities (SQLi, XSS, broken auth) across web targets.
AlumNet – Secure Alumni–Student Mentorship Platform [Flask, SQLAlchemy, JS] Jan – Apr 2026
– Built a role-based web app (Student/Alumni/Admin) with a full STRIDE threat model; implemented bcrypt, RBAC, CSP, and rate-limiting, mitigating all OWASP Top 10 risks via in-house pentest before deployment.
AutoSchedule-GIK [github] [Python] Jan – Apr 2026
– Built a conflict-free timetable engine for GIKI handling room, faculty, and course constraints.
LNTv2.0 – Local Network Toolkit [github] [Python, Tkinter, Nmap, Metasploit] Jun – Jul 2025
– Built a GUI-based suite consolidating 10+ Kali Linux tools, reducing pentest task setup time by 40%.

Technical Skills

- | | | |
|----------------------------|------------------------|---------------------|
| • Penetration Testing | • Network Exploitation | • OWASP Top 10 |
| • Vulnerability Assessment | • Threat Modeling | • CVE Analysis |
| • Python (Advanced) | • C/C++ & SQL | • Bash Scripting |
| • Burp Suite & Metasploit | • Nmap & Wireshark | • OWASP ZAP |
| • Cisco Packet Tracer | • Linux (Kali, Ubuntu) | • Zero Trust Design |

Certifications

TryHackMe Top 6% (Global) • Google Cybersecurity • AWS Cloud Security • Networking for Ethical Hacking • Machine Learning • Bug Hunting

Strengths

- **Analytical Thinker:** Breaks down complex systems to identify and exploit security gaps methodically.
- **Self-Driven Learner:** Top 6% globally on TryHackMe through consistent independent practice.
- **Team Leader:** Leads a 100+ member cybersecurity society, running workshops and CTFs.
- **Detail-Oriented:** Delivers structured, professional reports with clear risk ratings and remediation steps.
