| 🏠 tryhackme.com/p/shehrozmajeed

Summary

Cybersecurity-focused CS student with hands-on experience in penetration testing, vulnerability assessment, and offensive security research. Proven track record designing secure systems from IEEE-style ML research to red-team automation and OWASP-compliant web apps. Top 3% globally on TryHackMe (12,000+ points).

Education

Ghulam Ishaq Khan Institute (GIKI) 2023 – Present
B.S. Computer Science | Relevant: Network Security, OS, Data Structures, Algorithms, AI
– Abdalian Higher Secondary School, Pakistan — 89% (2021–2023) *Pakistan*

Experience

NEXUS – Cybersecurity Society, GIK Institute 2024 – Present
President (May 2026 – Present); *previously Head, Cybersecurity Division* (2024 – Apr 2026) *Pakistan*
– Spearheaded workshops and CTF competitions, growing membership by 30%+; now leading industry speaker sessions and hands-on labs for 100+ members.
– Designed offensive security labs covering web exploitation, network scanning, and CTF methodologies.

CyberSecurity Malaysia Jun 2024 – Jul 2024
Ethical Hacking Intern (Remote) *Malaysia*
– Conducted vulnerability assessments on web apps using Burp Suite, Nmap, and OWASP ZAP.
– Produced structured pentest reports with CVEs, risk ratings, and remediation recommendations per OWASP Top 10.

Projects & Research

IPDR-Cloud – ML Proactive Disaster Recovery (Research Paper) [\[github\]](#) [Python, DQN, PyTorch] Jan – Apr 2026
– Co-authored IEEE-style paper; DQN agent on Google Cluster Trace 2019 achieves 96.5% SLA compliance with 0.5 min mean RPO and zero breaches.

KAPAv1.0 – Autonomous AI Attacker Simulator [\[github\]](#) [Python, ML, Scapy] Oct – Dec 2025
– Built autonomous AI agent for authorized red-team ops modeling recon→exploit→persist chains, cutting effort by ~60%.

Zero Trust Digital Twin [\[github\]](#) [Cisco Packet Tracer] Jan – Apr 2026
– Designed Cisco enterprise network digital twin with micro-segmentation and least-privilege access controls.

SOC Log Analyzer [\[github\]](#) [Python, Scikit-learn] Jan – Apr 2026
– Built isolation-forest ML pipeline for real-time log anomaly detection in SOC environments.

MedSentinel – IoT Rural Clinic Monitor [ESP32, Python, ML] Oct – Dec 2025
– Built ESP32 sensor-fusion system detecting Ghost Clinics with 86% accuracy and 95.8% uptime, validated by 8/10 NGOs.

Web Vulnerability Scanner [\[github\]](#) [Python, BeautifulSoup] Oct – Dec 2024
– Developed automated scanner detecting OWASP Top 10 flaws (SQLi, XSS, broken auth) across web targets.

AlumNet – Secure Alumni–Student Mentorship Platform [Flask, SQLAlchemy, JS] Jan – Apr 2026
– Built role-based web app with full STRIDE threat model; implemented bcrypt, RBAC, CSP, and rate-limiting, passing in-house pentest.

AutoSchedule-GIK [\[github\]](#) [Python] Jan – Apr 2026
– Built conflict-free timetable engine handling room, faculty, and course constraints for GIKI.

LNTv2.0 – Local Network Toolkit [\[github\]](#) [Python, Tkinter, Nmap, Metasploit] Jun – Jul 2025
– Built GUI-based suite consolidating 10+ Kali Linux tools, reducing pentest setup time by 40%.

CTF Writeups [\[github\]](#) [TryHackMe] Ongoing
– Documented detailed walkthroughs for Jr Penetration Tester and AI Security paths, covering tools and exploitation methodology.

Technical Skills

- | | | |
|----------------------------|------------------------|---------------------|
| • Penetration Testing | • Network Exploitation | • OWASP Top 10 |
| • Vulnerability Assessment | • Threat Modeling | • CVE Analysis |
| • Python (Advanced) | • C/C++ & SQL | • Bash Scripting |
| • Burp Suite & Metasploit | • Nmap & Wireshark | • OWASP ZAP |
| • Cisco Packet Tracer | • Linux (Kali, Ubuntu) | • Zero Trust Design |

Certifications

- | | |
|--|--|
| • Jr Penetration Tester Certificate [link] | • ISO 27001 ISMS Certified [link] |
| • AI Security Certificate [link] | • Foundations of Cybersecurity [link] |
| • AWS GenAI Camper [link] | • Machine Learning [link] |
| • TryHackMe: Burp'd [link] , OWASP 10 [link] | • TryHackMe Top 3% Global, 12k+ pts [link] |

Strengths

- **Analytical Thinker:** Breaks down complex systems to identify and exploit security gaps methodically.
- **Self-Driven Learner:** Top 3% globally on TryHackMe (12,000+ points) through consistent independent practice.
- **Team Leader:** Leads a 100+ member cybersecurity society, running workshops and CTFs.
- **Detail-Oriented:** Delivers structured, professional reports with clear risk ratings and remediation steps.
